# REPUTATION MANAGEMENT

Automatically increase the quality and quantity of your online reviews to capture shopper attention and inspire buying confidence.

Net Driven's Reputation Management ensures the customer experience you work hard to maintain is accurately represented online. Through integration with our Digital Marketing and Website solutions, along with a growing list of third-party business management software solutions, you can effortlessly solicit new customer reviews and showcase top reviews on your website without overburdening your daily workload.

NEW!
AUTOMATED REVIEW REQUEST
Generate reviews that represent your actual customer experience, not the outliers, by automatically requesting reviews from all customers the day after service is completed.[1]

NEW!
REPUTATION MANAGEMENT DASHBOARD
Our one-stop dashboard allows you to check the status of outgoing review requests, reply to reviews and see what source is driving your best reviews. Easily gauge your ROI by watching your review count and sentiment climb, plus track Google and Facebook statistics with clear, printable reports.

WEBSITE REVIEW TOOL
Inspire consumer confidence by automatically pulling your top reviews from Google and Facebook to the front of your Net Driven website.

MANAGED REVIEW RESPONSE
Enlist trained professionals to respond to both positive and negative reviews, boosting online engagement and reputation without creating more work for your team.

93%
of consumers say that online reviews influence their purchase decisions.[2]

[1]Users without a BMS integration will need to import customers to the Automated Review Request tool manually.
